

SPRAY TAN MAINTENANCE PLAN

1 PREP: 12-24 HOURS BEFORE

Pre-appointment exfoliation is the first step to achieving flawless results. Using an exfoliating scrub will clear away dry, dead skin cells so the spray tan lasts longer and fades evenly. Gentle enough for the most sensitive skin, **Norvell's Renewing Sunless Exfoliator Scrub** instantly eliminates dryness while evening out tone and texture. *Pro Tip: Be sure to complete any waxing, threading and/or shaving no later than 24 hours prior to your session. Do not apply any lotions, oils or perfumes before your session and use deodorant sparingly.*

2 PRIME: DURING YOUR SESSION

Your Tan Glam technician will apply a complimentary **pH Balancing Spray** to your skin. This clear mist boosts amino acid levels to hydrate the skin for better, more even absorption of the sunless solution. We provide complimentary hair nets, sticky feet and disposable thongs. *Pro Tip: Whatever you wear during the spray tan application will leave a tan line so be mindful as to what you wear during your session. Our solutions are machine washable but full nudity is also accepted.*

3 PERFECT: AFTER SESSION CARE

Using proper products makes a major impact on how long your tan lasts. Avoid bar soaps, body washes and moisturizers that are heavily-fragranced and contain oils, alcohol and sulfates. We recommend **Norvell's pH Balancing Cleanser** and **Body Butter** as both are packed with luxuriously moisturizing agents and skin nutrients like vitamin C and E. *Pro Tip: The longer you wait to rinse after application, the darker the tan will get for up to 24 hours. Your first shower should be a warm water rinse only and followed by soap only if you want to stop the color from developing darker.*

4 PROLONG: MAINTENANCE

Extend and enhance your color between sessions with a daily application of **Norvell's Venetian Color Extender Lotion** and **Facial Spray**. Both formulas combine violet and brown-toned bronzers designed to mimic that of a natural tan and together, they extend the life of your sunless color. *Pro Tip: Use a glove when applying sunless products so as to avoid hand discoloration.*

WAYS TO SAVE

- Tag your tan and send us a selfie [@tanglamnyc](https://www.instagram.com/tanglamnyc)
- Write a review on Yelp, Google, Facebook or the Knot

DID YOU KNOW

We've added makeup application and teeth whitening to our list of services.
